

# Surface Preparation Solutions

- EMMA and WTS equipment supports the 737NG, 777, 777X, 787, F-15, F-18, T-45, and C-17 programs.
- TAI earned these installations by approaching the challenge holistically, not just supplying equipment.
- EMMA integrates with tooling and existing infrastructure, while making a range of “semi-automated” surface preparation options possible.
